HARDWOOD FLOORING

DISCOVER OUR
COLLECTIONS

THE MOTHER OF ALL HARDWOOD FLOORS

Top-quality hardwood floors
made from Northern trees using
state-of-the-art technology:
That's the Wickham promise.

100% NORTH AMERICAN HARDWOOD

Wickham Hardwood Flooring is located in Wickham, Quebec (Canada). Active for more than 30 years in hardwood floor manufacturing, the company is entirely self-sufficient with its own kilns and processing plant including finishing lines. Renowned throughout Quebec and the rest of Canada, it also exports a significant portion of its production abroad, notably to the United States, Europe, Asia and the Middle East.

3 collections

FOR ALL TASTES & BUDGETS

If you are considering changing or upgrading your decor, you should choose Wickham Hardwood Flooring because we have what you are looking for. Pure and simple! - All our wood comes from sustainable sawmills

Wild West Collection

THE TRUE NATURE OF WOOD

Enjoy the true nature of wood with all its subtle nuances and warm patterns. Thanks to our wire brushing technique, each plank's texture and personality is revealed. The addition of unique tints conveys a classic or contemporary look. This collection offers an authentic and long-lasting floor that effectively hides scuffs and scratches.

COMPARATIVE GUIDE

SOLID

Natural, warm and tough, hardwood floors offer exceptional durability, and all the elegance your personal style deserves. They also add to your home's resale value. What more could you ask for?

ENGINEERED FLEXCORE

Under humid conditions, an engineered floor offers greater stability than a regular hardwood floor. It's therefore an ideal option for condominiums and sub-levels work, because it can be easily installed on concrete surfaces. Made with a filleted wood blocks core, with a Basswood backin, and topped with our usual 4mm (5/32 in.) top layer of hardwood, this engineered platform meets Wickham's most rigorous standards.

ENGINEERED BALTIC BIRCH

Under humid conditions, an engineered floor offers greater stability than a regular hardwood floor. And because it can be easily installed on concrete surfaces, it's the ideal choice for condominiums and basements. Made with a core of Baltic birch wood veneered with a 5/32 in. (4mm) layer of hardwood, this engineered floor meets Wickham's most rigorous standards.

GRADESENSEMBLE D'ENTRETIEN BIODEGRADABLE POUR PLANCHERS DE BOIS

Every tree is unique, like a fingerprint, and every piece of wood is assigned a grade corresponding to its natural characteristics. This system is unequalled for proving wood's authenticity.
